

RED MOUNTAIN
Golf Club • Phuket

Course Under Maintenance

Dates: 2nd – 30th September 2019

**Recovering after Core Aeration
of All Green**

How long is the green aerification process?

We always try to prepare the courses and have them in the best possible shape throughout the year. It typically takes 3-4 weeks for the greens to heal where you cannot see the holes due to aerification and the greens are normally rolling smooth.

We apologize for any inconvenience caused.
